---

PROJECTS

AIRBNB-CLONE

https://airbnb-curpra-clone.vercel.app/

This is a project built with Reactjs, Nextjs, Mapbox, React-Date-Picker, Styled-Components and Tailwind CSS. In this clone user can search for location to find selected hotels for booking alongside a map to view the hotel location.

FULL STACK MOVIE WEB-APP

https://movie-webapp.vercel.app/

A MERN full stack movie web app built with React, Node.js, MongoDB and Express.js, user is required to sign up then login in other to have access to varieties of movie and then login user can watch movie trailer.

DEVELOPER PORTFOLIO

https://curtisdev.netlify.app/

This website was built using react.js, styled-components, react animation library, it also includes dark and light themes which is also a Progressive Web Application (PWA). It consists of a developer profile and project which he has worked on previously.

UI-LANDING PAGE

https://dataware.netlify.app/

This website was built from a UI designed on Figma, using HTML, SASS and JavaScript which include custom carousel written in pure CSS.

JENOLA CONSULT

https://jenolaconsult.com/

This website was built using react.js, styled-components, react animation library, and react-router.

REACT WEATHER APP

https://curpraweather.vercel.app/

In this project, I use React.js, TypeScript, Redux, Chakra-UI and fetch response from a weather API.

MOVIE WEB-API

https://movieapicurpra.netlify.app/

In this project, I have used pure HTML5, CSS3, JavaScript and an API that I fetch movie data with an API fetching library Axios, from which consist of a movie images, rating and the likes

---
